THERMO-TRANSFER
MATERIALS

FOR CLOTHING PERSONALIZATION

 Made in Italy 

OUR FACTORIES

SO.L.TER. srl
Warehouse and production
Legnano

SO.L.TER. srl
Headquarter and production
Busto Arsizio

SO.L.TER. has been active on the market since 1990.

The production of artefacts is currently carried out in our historic headquarters placed in Busto Arsizio, in our Skinplast factory placed in Basiano and in the new Legnano factory.

The products are largely made of polyurethane, using extrusion technologies, coatings with solvents, coating high solid solvent free and water-based coating.

With the Skinplast division, we are now able to operate also with PVC coating using green plasticizers.

SKINPLAST
Basiano

We operate with four different divisions to meet the specialized needs of different markets.

75% of our products are exported to all continents.

Long-standing experience of our technical department is at your disposal to study the best solution to fulfill your projects requirements.

Our highly flexible organization can satisfy large and small production always meeting quality level, delivery time and specific demands.

Do not hesitate to ask for information on our different productions.

TO BE LEADERS IN THE WORLD

LEADER IN THERMO-TRANSFER MATERIALS

THERMO-TRANSFER FILMS FOR PRINT AND CUT

With Solvent, Ecosolvent, Latex and UV plotters

THERMO-TRANSFER FILMS FOR CLOTHING PERSONALIZATION

Color heat transfer films

THERMO-TRANSFER FOR LASER AND INK-JET WATER-BASED PRINTING

Suitable for the photographic industry, promotional and amateur

LEADER IN POLYURETHANE FILMS, SHEET AND TECHNICAL COATED FABRICS

EXTRUSION OF FILMS AND FOILS FOR MEDICAL FIELD, FOOD INDUSTRY, SPORT&SAFETY

TPU polyether and polyester various thicknesses starting from 100 microns up to 5 mm

MONO AND BI-COATED OR MULTILAYER FABRICS FOR NAUTICAL, MARINE FIELD, FOOD INDUSTRY, SPORT&SAFETY

Hot and high frequency weldable nylon or polyester

LEADER IN PVC/TPU COATED MATERIALS FOR BINDING AND PACKAGING

PRODUCTION OF NOBILITY PAPER

With quality PVC coating and extruded TPU coating

PRODUCTS

For the bookbinding, publishing and packaging sector

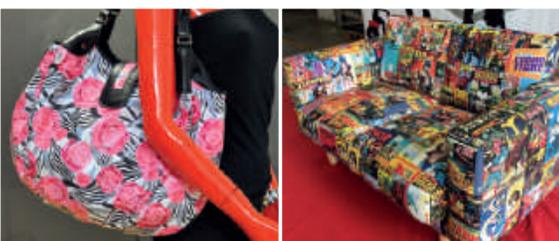

MATERIALS FOR WALL DECORATION FIELDS

Digital Affresco, Digital Graffiti and Digital Parati

REALIZATION

Of special coating with different thickness and embossing

LEADER IN PRINTABLE ECO-LEATHER MATERIALS

PRINTABLE LEATHER

With Solvent, Ecosolvent, Latex and UV plotters

SURFACE

100% polyurethane with special coating

REALIZATION

Of special coatings with different thickness and embossing

OUR SERVICES

For big productions we offer digital service with our HP LATEX 3500

TOP MATERIALS

FLEX CLASSIC

For application on cotton and polyester.
WITH ADHESIVE CARRIER.

FLEX CLASSIC is our **TOP MATERIAL** for cutting.
The material is available in many colours with a matt surface.
The composition is 50% Polyurethane and 50% Copes.
The colored part (45µm), bounded to the special thermo-adhesive part (45µm), makes it possible to create **small lettering and let you remove the polyester-hot with speedness, after the application.** The material can withstand direct ironing.

USING OUR INSTRUCTIONS, IT IS POSSIBLE FOR ALL THE COLOURS TO CREATE OVERLAPPING!

CARBON FLEX

For application on cotton and polyester.
WITH ADHESIVE CARRIER.

CARBON FLEX is our new carbon effect polyurethane article, available in 11 colours, (7 pastel and 4 metallic colours).

Its surface aspect does not suffer from any alterations after the hot application, staying really well visible and above all very realistic to the touch.

TRY IT AND YOU WILL NOT BE DISAPPOINTED!!!

FLEX GEL

For application on cotton, polyester and nylon.
WITH ADHESIVE CARRIER.

F-GEL is our foam material that gives your logos originality and uniqueness. Thanks to a new technology, developed in our laboratories, F-Gel is a unique product on the market. **The peculiarity of this material, with its 750 microns thickness, is its soft tree-dimensional effect.** Moreover, let's have fun overlapping it with the other flex materials till 3 times! After the heat-press, the material becomes around 10% thinner, keeping its soft 3D effect.

**WITHOUT ADHESIVE CARRIER
COMING SOON!**

SPORTS

NEW FLEX SPESSO

For application on cotton, polyester and nylon.
WITHOUT ADHESIVE CARRIER.

FLEX SPESSO is a new proposal that allows similar solutions to Flex Gel material. Flex Spesso, with its 500 microns thickness, has an easier method of working than Flex gel.
